

Solda-Met™ 3C

Soft Solder Flux Paste

Solda-Met™ 3C is a highly active soft soldering flux paste formulated for use with soft soldering alloys for soldering with a soldering iron, hot air gun, flame or induction heating process. It is intended for use on difficult to solder materials such as stainless steel. It can also be used on mild or carbon steel and copper alloys such as brass and bronze.

Standard	Proprietary	
Melting Range	180°C - 350°C	
Chemical Composition	Proprietary	
Conditions for Use	The residues should be removed after soldering by immersion in hot or cold water.	
Physical Properties	Liquid flux	
Forms of Supply	1l pots
